

Project Deadline-1 Rubric - Tank Stars Game

UML Use-case Diagram: (2 %)

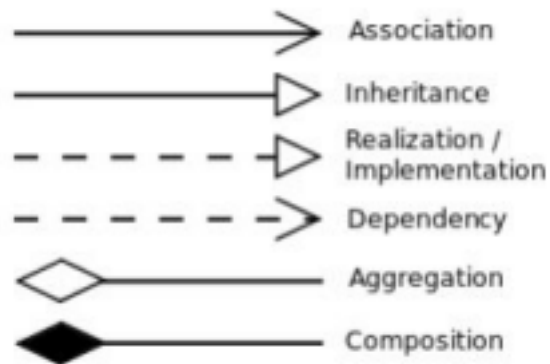

Category	Total marks	Remarks	Partial Marks
Use cases	4	User communicating with at least four of these: a) start_game, b) restart_game, c) resume, and d) exit	1*4=4
Relationships	8	Meaningful demonstration of <<include>> relationship along with appropriate arrow	4
		Meaningful demonstration of <<extends>> relationship along with appropriate arrow	4
Multiplicity	4	Meaningful demonstration of multiplicity	4
Misc.	4	Correctness of diagram (Generalization and Association)	2
		Actor with stick diagram and system boundary shown correctly	2
TOTAL	20		

- 1) Generalization: Solid arrow with hollow arrowhead.
- 2) Association: Solid arrow with regular arrowhead.
- 3) Include and Extend: Dashed arrow with regular arrowhead. The relationship name should be mentioned on these arrows. (e.g, <<include>>, <<extends>>)

UML Class Diagram (3 %)

Classes	8	All these basic classes are present: a) Game, b) Tank, c) Shooter, d) Player *Shooter class is the class that manages the power and angle of the projectile. It could have any other name as well, but has to be separate from the tank class.	$2 \times 4 = 8$ (Any similar or other reasonable Classes also work)
Minimum Attributes (Variables and Functions)	10	Minimum attributes: Tank class -- a) position :Int/Float	1
		Player class- a) current_health, b) tank:Tank	1
		Shooter: a)angle: float b)power: float	1
		Game: a) player: Player	1
		App: functions - loadGame(), pauseGame(), startGame(), saveGame(), exitGame(), restart()	6
Class Relationships	2	Special Tanks should have an inheritance relationship with the base Tank class	1
		Game class should comprise Player and Tank classes.	1
Multiplicity	6	Multiplicity shown appropriately, e.g, Tank-Special Tanks(1..*), Game-Player (2), Player-Tank (1)	$2 \times 3 = 6$

		Please account for three instances of multiplicity shown correctly.	
Serializable Interface	4	Every Class except App Class should implement Serializable interface	4
TOTAL	30		

Arrow Definition in Class Diagrams

GUI Deadline: 5 %

Please check that the screens students are presenting during the demo are by running the code, and not just the screenshots.

No marks should be deducted in case the navigations in between screens don't work.

Category with total marks	Element	Remarks	Partial Marks
Main Menu (15 points)	Start Game Button	5 points	N.A.
	Load game/ Saved games button	5 points	N.A.
	Exit	5 points	N.A.
Game Page (20 points)	2 tanks on screen	5 points	3.5 if one tank is implemented
	Health of the 2 players at the top of the screen (Position	5 points	3.5 if health of one player is

	only- may not be updated dynamically)		shown
	Ground	5 points	N.A.
	Pause Game button	5 points	N.A.
In-Game Menus (15 points)	Pause Menu	5 points	N.A.
	Save Game button	5 points	N.A.
	Restart Game button	5 points	N.A.
Total		50 points
