

Project Deadline-2 Final Rubric - Tank Stars Game

Basic Components:

Category	Total marks	Remarks	Partial Marks
Pages Linked	14	1) Home page 2) Choose tank page 3) Game page	4+ 4 + 6
Home Page Components	8	1) On clicking load game button, the previous saved game should be loaded (game page) or it should lead to a screen for choosing from multiple saved games 2) Exit App should close the window. 3) On clicking the choose tank button, a screen should be shown where the user can choose the tank.	4 + 2 + 2
Choose Tank Page Components	4	1) Should allow users to choose tanks to play using buttons.	4
Game Page Components	30	1. In game menu to pause and resume the game, save game and a button to go to main menu 2. Health of both the players would be displayed and updated based on the gameplay 3. The tank should move on the ground 4. One controller preferably using mouse to set the angle and power of the shot 5. One button to fire	4+4+4+4+4+6+4

		6. On firing the projectile, impact should be visible through health of the player and motion of the tank 7. The game should be over when the health of one of the players becomes zero.	
In Game Menu Components.	4	1) Save game button should be working 2) Exit game should close the game	2 + 2
TOTAL	60		

Relative Components:

Category	Total marks	Remarks	Partial Marks
Implementation	14	1) Design Patterns 2) Modular Code or 3) Any other genuine implementation mentioned	8 + 6
GUI part	14	1) Different Animations used. 2) Splash screen 4) Different artwork concept than the one in the game.	5 + 5 + 4
Junit Tests written	12	At least 4 unit tests written in Junit	3 * 4
Bonus marking	20	1) Make use of drops between matches to make the game interesting and allow players to take advantage over one another. They need to be placed appropriately so that both the tanks have fair chances of picking up the drops. Add at least 1 type of special attack that is available from the air drops (e.g. Air strike, Big one,	

		etc.) 2) Add destruction/mutilation to the ground upon projectile hitting, as in the actual game with animations. 3) For each and every bonus give 1 mark. Note that this 1 mark is not the absolute mark but rather indicates what is the total number of bonus points. If someone has come up with interesting modes of their own, for example, add Player vs. Computer mode to the game, where the computer's actions have to be automated with some amount of intelligence and not completely randomized, then consider these as eligible for bonus as well. 4) Mention bonus components in the marks sheet. 5) Maximum bonus marks to be given to any group = 20	
If no equal contribution is shown in slide then bring to the notice of instructor			
TOTAL	40 + Bonus(20 Max)	60 (maximum marks)
